

RELEASE NOTICE FOR SWARPLUG

Version 1.4.3 (follows v. 1.2.1 to be in line with Swar Librarian)

Platform	Improvement
Win/Mac	Lowered pitch-bend "smoothing" coefficient that made the plugin less responsive to fast pitch modulations. SwarPlug is now fully in line with SwarShala and Swar Librarian, so that complex pitch modulations (meends) are played exactly the same way on SwarPlug.
Win/Mac	Updated definition files and samples (already in previous version).
